

## Computer Crime

### CSI / FBI 2001 Computer Crime and Security Survey Likely Sources of Attack

Fortune 1000 companies experienced losses of more than \$45 billion from thefts of proprietary information. (ASIS)

In the US 387,000 laptops were stolen in 2000, valued at over \$1 billion ... (Safeware Insurance Co.)

57% of computer crimes were linked to stolen laptops which were then used to break into corporate servers later on. (FBI, 2001)

It is estimated that full-time employees, as well as contractors with access to the workplace, are responsible for 75% of all cases involving corporate computer theft. (FBI, 1997)

## The aspects benefits...

- Monitors IT cabinets, servers, PCs, laptops, audio-visual equipment, art & personnel on a single application
- Reduces Total Cost of Ownership of IT estate
- Reduces time taken for Help Desk callouts
- Pro-active notification of asset movement
- Centralised "Change Control" management
- Asset location and 'real time' audit every 30 seconds, for lifetime of asset
- No further need for costly manual audits
- "Phantom" purchases a thing of the past
- Enhances corporate integrity
- Integrates with third party systems
- Fast modular installation and low maintenance

## Our Customers say...

- "The cost of implementing the system was instantly justified"  
(Norman Jinks, DfES)
- "With Aspects we know the whereabouts of all our assets, all the time"  
(Anna Williams, WPP)
- "The system was installed and cost justified within 6 months"  
(Chris Ferris, BT Ignite)

## Technical Concepts

- Miniature movement sensing tags monitor static assets
- Mobile tags track movement of portable assets and personnel
- All tags have unique ID
- Tags communicate with concealed sensors located at exits and inside the building
- Sensors linked on daisy chain to Aspects PC
- Tag ranges up to 40metres
- Tag life expectancy 5 years
- Tags reusable
- All tags anti-tamper

## aspects™

- 8 years of development
- Windows NT & 2000
- Real-time alarm graphics
- Easy-to-use "buddying" of portable assets and personnel
- Static asset alarm sensitivity individually programmable
- Historical log of all alarms and legitimate asset movement
- Fast tag/asset registration
- Real-time asset register 24/7/365
- Multi-user - password protected
- Analysis Tools
